Our Story

The time when everyone was having beard craze, there was a team of friends aiming to have a beard like no one else, thick, shiny and Attractive. But I noticed that growing and maintaining a beard was not an easy feat. They have tried almost every existing product in the market but FAILED to have those desired results AS PROMISED. After getting disappointed they started sorting out the necessary elements that can help to grow and maintain the Beard, with no itching and irritation at all.

After comparing 50+ top leading brands all over the world, researching almost every existing skin friendly ingredient that can accelerate the growth of Facial Hair, make the beard look shiny and attractive, and can fill the patches of already grown patchy beard. They started manufacturing multiple samples and trying on themselves.

The results were quite impressive and surprising. So, they decided to rescue all those who got stuck in the trap that required you to buy multiples of product to grow, remove patches, or maintain your beard.

This is how “BaBa Beard” a Beard Care Company came into existence, to cater the Best product to their bearded Brothers.
